

JavaScript Operators Practice Questions (Beginner)

Level 1: Variables & Arithmetic

- Q1. Create a=20 and b=5. Print sum, difference, product, quotient, remainder.
- Q2. Store your age and add 5.
- Q3. Find area of rectangle (length=10, width=5).
- Q4. Find perimeter of rectangle.
- Q5. Find average of three numbers.
- Q6. Convert minutes to seconds.
- Q7. Convert hours to minutes.
- Q8. Swap two variables without a third variable.
- Q9. Find square of a number.
- Q10. Find cube of a number.

Level 2: Assignment Operators

- Q11. x=10; use +=15.
- Q12. x=50; use -=20.
- Q13. x=8; use *=2.
- Q14. x=100; use /=5.
- Q15. x=25; use %=7.

Level 3: Comparison

- Q16. 20>15
- Q17. 10=='10'
- Q18. 10===10
- Q19. 50<=30
- Q20. 100!=100
- Q21. null==undefined
- Q22. null===undefined

Level 4: Logical

- Q23. age=20, hasID=true. Can enter?
- Q24. isLoggedIn=false, isAdmin=true. Use ||.
- Q25. marks=85. Check between 80 and 100.
- Q26. Reverse true using !.
- Q27. raining=false. Print opposite.
- Q28. Check age>18 && salary>50000.

Q29. Check Saturday or Sunday.

Q30. Create your own logical example.

Level 5: Ternary

Q31. Adult or Minor.

Q32. Larger of two numbers.

Q33. Even or Odd.

Q34. Logged in or not.

Q35. Pass or Fail.

Level 6: String Operators

Q36. Join 'Hello' and 'World'.

Q37. Combine first and last name.

Q38. Print 'My age is 20' using concatenation.

Level 7: Optional Chaining & Nullish Coalescing

Q39. Safely print user.address.city using optional chaining.

Q40. username=null. Print 'Guest' using ??.
