

JavaScript Data Types — Practice Questions

25 beginner-friendly questions to test your understanding

Basics (Identify the Type)

1. What is the data type of `let x = 10;`?
2. What is the data type of `let name = "Alex";`?
3. What is the data type of `let isActive = true;`?
4. What is the data type of `let y;` (declared but not assigned)?
5. What is the data type of `let z = null;`?
6. What will `typeof "hello"` return?
7. What will `typeof 42` return?
8. What will `typeof undefined` return?
9. What will `typeof null` return? (famous trick — guess first!)
10. What will `typeof true` return?

Primitive vs Non-Primitive

11. List all 7 primitive data types in JavaScript.
12. Is an array a primitive or non-primitive type?
13. Is an object a primitive or non-primitive type?
14. What is the data type of `let big = 123456789012345678901234567890n;`?
15. What is the data type of a function in JS?

Type Coercion (JS Auto-Converting Types)

16. What is the result of `"5" + 3`? What is its type?
17. What is the result of `"5" - 3`? What is its type?
18. What is the result of `5 + true`?
19. What is the result of `"10" * "2"`?
20. What is the result of `1 + "1" + 1`?

Comparisons

21. What is the difference between `==` and `===`?

- 22. What does `"5" == 5` return?
- 23. What does `"5" === 5` return?
- 24. What does `null == undefined` return?
- 25. What does `null === undefined` return?

Bonus (Slightly Trickier)

- 26. What is the data type of `[]` (empty array)?
- 27. What is the data type of `{}` (empty object)?
- 28. What does `typeof NaN` return?
- 29. What does `Number("abc")` return, and what is its type?
- 30. What do `Boolean(0)`, `Boolean("")`, and `Boolean(null)` all return?

Tip: Try answering these on paper or in your head first, then test them out in your browser console (right-click a page → Inspect → Console) to check your answers.
